Professional Summary

AWS Certified DevOps Engineer with 4+ years of experience designing, automating, and managing cloud infrastructure on AWS. Skilled in Terraform, Kubernetes (EKS), Docker, Jenkins, CI/CD, Infrastructure as Code, and production support. Experienced in building scalable, secure, and highly available cloud platforms.

Work Experience

08/2024 – present
Pune, India

Cloud DevOps Engineer

Orient Technologies Ltd

- Manage AWS cloud infrastructure across dev, staging, and production environments, **ensuring 99.9% availability** and adherence to security best practices.
- Deploy and maintain containerized applications on **Amazon EKS and ECS**, supporting scalable microservices-based architectures.
- Implemented Infrastructure as Code using Terraform, reducing infrastructure provisioning time by **70%** and improving deployment consistency.
- Design and automate **CI/CD** pipelines using Jenkins, Git, AWS CodePipeline, and CodeBuild, reducing deployment effort and release time.
- Administer AWS services including EC2, VPC, S3, RDS, ELB, Auto Scaling, Route 53, IAM, CloudWatch, and CloudTrail.
- Orchestrate Docker containers within Kubernetes clusters, managing namespaces, **Blue/Green Deployment**, services, ingress, and autoscaling configurations.
- Implement centralized logging and monitoring solutions using CloudWatch, Prometheus, and Grafana for proactive incident detection.
- Automate routine operational tasks using Shell scripting and Python, reducing manual intervention and operational overhead.
- Conduct root cause analysis (RCA) for production incidents and implement preventive measures to improve platform stability.
- Manage backup, disaster recovery, and high-availability configurations for critical production workloads.

10/2023 – 08/2024
Remote

DevOps Engineer

Remote

- Delivered AWS cloud migration, infrastructure setup, and DevOps consulting services for multiple client engagements.
- Built reusable Terraform modules and infrastructure templates, accelerating environment provisioning and standardization.
- Designed and automated CI/CD pipelines that reduced release time from **2 hours to 15 minutes**.

10/2022 – 10/2023
Pune, India

Software Engineer

Crisil India Ltd

- Supported enterprise application deployments across development, testing, and production environments.
- Collaborated with development teams to troubleshoot deployment issues and improve application delivery pipelines.
- Participated in release planning, change management, and production support activities.
- Monitored application performance and system health, ensuring service reliability and availability.
- Developed automation scripts for operational tasks, improving team productivity and reducing human errors.

08/2021 – 10/2022
Pune, India

DevOps Engineer

NeoSoft Technologies

- Managed AWS services including EC2, S3, IAM, VPC, and Load Balancers for application hosting.
- Docker containerization and Kubernetes orchestration for enterprise applications.
- Performed Kubernetes cluster administration, deployment management, and troubleshooting activities.
- Assisted in application migration from traditional environments to containerized platforms.
- Improved deployment consistency and reduced configuration drift through infrastructure automation practices.
- Configured CloudWatch monitoring, dashboards, and alerting mechanisms to enhance infrastructure visibility.
- Collaborated with cross-functional teams to resolve production issues and optimize application performance.

Education

09/2016 – 06/2019

BACHELOR OF ENGINEERING

Dr. D.Y Patil College of Enginnering, Akurdi,, Pune

09/2013 – 06/2016

DIPLOMA

Government Polytechnic Awasari Khurd, Pune

Skills

- **Cloud Platform** : AWS (EC2, VPC, IAM, S3, Route53, ECS, EKS, RDS, SNS, Lambda, ElastiCache, ELB, Auto Scaling, WAF, CloudWatch, CloudTrail)
- **Infrastructure as Code** : Terraform, AWS CloudFormation
- **CI/CD Tools** : Jenkins, AWS CodePipeline, GitHub Actions, Argo CD
- **Containerization & Orchestration** : Docker, Kubernetes, Amazon EKS, Amazon ECS
- **Configuration Management** : Ansible
- **Source Code Management** : GIT, GITHUB
- **Build Tools** : Maven
- **Monitoring & Logging** : CloudWatch, CloudTrail, Prometheus, Grafana
- **Scripting** : Shell Scripting, YAML, Groovy
- **Operating Systems** : Linux (RHEL, Ubuntu), Windows Server
- **Databases** : MySQL (Amazon RDS)
- **Other Tools** : MS Office_(PowerPoint, Word, Outlook), JIRA

Certifications

05/06/2025

AWS Certified DevOps Engineer – Professional (DOP-C02)
